

Order No. 4.24270 Wobbly Sheep

Order No. 4.24273 Wobbly Wild Boar

Play value

The artist took hold of the subjects sheep and flock on different levels and abstracted it with flair. The thick, shaggy wool, the softly shaped ears and the gawky feet of a sheep are transposed as well as the patient and humble appearance which a sheep has while grazing. Even if the movement does not immediately bring to mind an association with sheep, the fine, wobbling of the body reflects the undulations of a walking flock. When standing in a group, these art objects evoke associations with flocks of sheep, unity in variety, and even - due to successful abstraction - one's relationship with nature. The sheep is equally suitable for an artistically designed play point in urban environments. In leisure areas, the animals can be used as amusing, alternative seats for young and old, which promote relaxation and ease by their movement. Children's spaces get an unmistakable identity from a flock of sheep.

Order No. 4.24274 Wobbly Calf

Fundamental characteristics

- Art Play
- Incentive for playing: friendly appearance, animal
- Movement: climbing, sitting, little wobble effect

Recommended for

- Supervised play areas, such as kindergartens, schools, after-school programmes or similar
- Public play areas without supervision, such as playgrounds, parks or similar

Wobbly Calf**

Scale 1:50

Safety check according to DIN EN 1176

Components

1 Animal with wobbling mechanism, in various sizes, with ground anchor made of steel

Installation information

Surfacing requirements corresponding to a fall height of ≤ 1.00 m (please refer to price list for more detailed information)

Foundations
Excavation depth for ground anchor 85 x 70 x 40 cm

Attention:
Exact measurements may vary; for all installation dimensions refer to current assembly instructions.
Technical changes reserved.

Technical information

Equipment made of solid poplar wood, worked on by hand, boiler pressure impregnated according to DIN 68800-3, use class 4

Richter Hercules type rope

Richter Hercules type rope, a combination of galvanised six-strand steel cables and polyester yarn, diameter > 20 mm, laid and glued with very good abrasion resistance, strong sheathing even in the case of damage by puncturing

Ground anchor

All parts used for anchoring to the ground are made of hot-dip galvanised steel or stainless steel

For more detailed explanation of the quality characteristics see price list.

Bearing: rubber-metal connection only intended for gentle movement

Standard colour rope (ears): natural

**Order No. 4.24274
Wobbly Calf**

Tail made of PP rope, \varnothing 16 mm, 3 strands, weather-resistant, standard colour: natural

Dimensions

(every animal is unique, the indications of the measurements may vary)

**Order No. 4.24270
Wobbly Sheep**

Length	0.70 m
Height	0.70 m
Width	0.40 m
