

**Play value**

Spatial limitation, sitting possibility, equipment for games of skills and for experiencing movements. All this is given by the „Lounging Logs“ installation. This equipment is suited to define play areas and to separate play equipment for different age groups in a positive way. In particular, alternative places to sit, are offered to young people. If someone wants to stand out, they can balance along the beams projecting on both sides. Restlessness and strain can be reduced while slightly rocking up and down on the beams. Furthermore, communication is encouraged, when several children are swinging up and down together.

Standard colour is red.

**Lounging Logs**

**Technical information**

Equipment made of non-impregnated mountain larch / robinia

**Peeled white**

Palisades peeled white means that bark, cambium and sapwood are removed, the natural shape of the trunk is preserved and can be experienced

**Bevel cut**

Vertical stand posts with bevelled end grain section as constructive wood preservation measure

**Interlocking**

Interlocking connection, with milled metal rings or serrated disc dowels, to reinforce the bolt connection under high loads transverse to the grain direction of the wood

**Relief cut**

Targeted relief cut as an effective measure against cracks caused by drying. The cut defines the position of the stress equalization in the trunk and minimises natural cracking

**For more detailed explanation of the quality characteristics see price list.**

Connection of horizontal beams to the support posts according to static requirements

**Colour**

Solvent-free acrylic paints are used for colouring; the wood is processed in a way which allows the structure of the wood to remain clearly visible, standard colour red
